

Team #7 CSS Report

Matthew Bayne, Dan Bello, Ronald Estevez, Sunmin Lee, Greg Strakhov

www.babysealsband.com

List of CSS Properties Used:

- font-family
- font-size
- text-align
- color
- background-color
- position
- top
- right
- max-width
- height
- width
- padding
- margin
- border
- border-top
- border-bottom
- vertical-align
- flex-basis

List of CSS Classes Defined and Rationale for Defining Them:

- .titular
 - o specifies the font-size and text-align for the title of the website
- .row
 - o sets the properties of the nav bar as flex display
- .linkcell
 - o specifies the stylings (font, background color, design of the border, etc) of the nav bar
- .imageContainer

- specifies the position and background color of the base guitar image on the home page
- .centeredText
 - specifies the position, font size, and color of the text “We are Baby Seals” on the home page
- .button
 - specifies the background color, properties of the border, and properties of the text in the “Buy Now” button for the Merchandise page

Additional Functionality To Be Implemented with JavaScript:

- In the merchandise page, when the cursor hovers over the “Buy Now” button, we could create pop-up messages.
- When the cursor hovers over the header tabs, we can use JavaScript to highlight it to another color.
- Overall, we can implement JavaScript to create a more welcoming and colorful webpage with moving texts and/or images.

Individual Team Member Contributions:

1. Matthew Bayne
 - a. Styling of buttons
 - b. Report Document
 - c. Image styling
2. Daniel Bello
 - a. Formatting of pages
 - b. Pages styling
 - c. Styling of images on pages
3. Ronald Estevez
 - a. Version control implementation
 - b. Text and color styling
 - c. Header insertions
4. Sunmin Lee

- a. Report Document
- 5. Greg Strakhov
 - a. Responsive Design...mobile-friendly
